## CELL COMPONENT – JOB ADVERTISEMENTS

---

You will create a “Job Advertisement” centered on a particular part of the cell.

Your report must:

1. Describe, in detail, the part of the cell you are focusing on
2. Describe, in detail, what your part of the cell does for the cell as a whole
3. Identify if it is part of an animal cell, plant cell or both. If it is part of both types of cells, it will detail how they differ given which cell they are located in.
4. Diagrams: what your cell component looks like and where it is located within the cell

| Scoring Rubric – Job Ad   |   |
|---------------------------|---|
| Score                     | Criteria  |
| 3                         | The advertisement includes all key features of the cell component. It includes a realistic job description              |
| 2                         | The advertisement includes the majority of the key features the cell component. It includes a realistic job description |
| 1                         | The advertisement includes some of the key features of the cell component. The job description is not realistic.        |
| Scoring Rubric - Diagrams |   |
| Score                     | Criteria  |
| 3                         | The diagrams include all key features of the plant or animal cell and the cell component.                               |
| 2                         | The diagrams include some key features of the plant or animal cell and the cell component                               |
| 1                         | The diagrams include few key features of the plant or animal cell and the cell component                                |
