

On a separate sheet of paper answer the following questions. Questions 1, 2 and 4 may be answered in a point form manner. Questions 3 should be done in sentence / paragraph form. Question 5 can be filled in below or on a separate piece of paper. Attach this sheet to your answers as a cover sheet prior to submission.

1. DNA evidence points to human origins beginning in Africa, and that humanity migrated out of Africa to the other parts of the planet over time. When did humans leave Africa, when did they arrive in North America and how long did this migration take?
2. What are the two broad categories that describe the factors that drive human migration and provide two examples for each category.
3. Two primary sources of evidence were mentioned during this lesson, identify them and explain how they demonstrate human habitation of North America.
4. What are the two main theories used by scientists, historians and anthropologists to explain how humans arrived in North America?
5. Cause and effect is a useful tool for understanding past events. Fill in the Cause-and-Effect template provided, identifying two causes and two consequences of human migration to North America.

** This assignment is a formative assessment, and as such is not for marks. It will provide me with a means of assessing your understanding and providing you with feedback prior to the assignment at the end of this unit's section. Doing well on / learning from this assignment will lead to you doing well on the assignment to come later. **
